

F0888NN Gold Line

red

Typical analysis

Assay	min 97%
Calcium (Ca)	0.05%
Copper (Cu)	0.01%
Loss on ignition	1%
Magnesium (Mg)	0.03%
Manganese (Mn)	0.05%
Zinc (Zn)	0.02%

Packaging

500g black plastic jar

**Physical properties, composition and data**

Chemical formula	Fe ₂ O ₃
Chemical group	Oxides
Synonym	Ferric sesquioxide; Jeweler's rouge
Occurance in nature	In the Earth's crust in the mineral haematite
Atomic weight	159.69
Appearance	Dark red powder
Density (g/ml)	5.12 - 5.24

Laboratory preparation, applications and practices

Laboratory preparation	Dehydration of ferric hydroxide
Usage	Pigment. Synthesis reagent

Storage and handling information

Safety phrases	26
Risk phrases	36-37-38
Disposal methods	3
Caution	The dust can cause pneumoconiosis

Transport regulations

Tariff code	2821.10.10
