

N1625HH		Platinum Line
Warranty certificate		
Assay (GLC)	min 99%	
Insoluble matter in acetic acid	0.02%	
Iron (Fe)	0.001%	
Lead (Pb)	0.001%	
2-Naphthylamine	0.5%	
Sulphated ash	0.05%	

Packaging
100g black plastic jar

Physical properties, composition and data

Chemical formula	$C_{10}H_7.NH_2$
Synonym	1-Naphthalenamine; 1-Amino-naphthalene; α -Naphthalamine; Naphthalidine
Chemical group	Hydrocarbons
Atomic weight	143.19
Appearance	White needles
Odour	Unpleasant odour
Melting point	48 - 50°C
Boiling point	301°C
Flash point	157°C
Other information	Becomes red on exposure to air
Hazardous material	Harmful
Solubility	Soluble in alcohol and ether
Density (g/ml)	1.13

Laboratory preparation, applications and practices

Laboratory preparation	Reduction of α -nitronaphthalene with iron and hydrochloric acid
Usage	Dyes and stains

Storage and handling information

Storage/handling	Keep container well closed and protected from light
Safety phrases	24
Risk phrases	22
Disposal methods	16

Transport regulations

Tariff code	2921.45.00
Hazardous class	6
Packing group	III
UN number	2077
